Cultivating undergraduates' practical and innovative abilities relying
on experimental teaching demonstration center

Zhou Yijun, Feng Jinchao, Dai Jingfeng

(College of Life and Environmental Sciences, Minzu University of China, Beijing 100081, China)

Abstract: The experimental teaching demonstration center is an important platform of cultivating the practical and innovative abilities for undergraduates. By revising and improving the experimental center management system, and strengthening management, the awareness of responsibilities of experimental center managers and teachers is improved. Based on the experimental teaching demonstration center, undergraduate students develop their practical and innovative abilities, by completing the experimental teaching, research training programs and participation in academic competitions. Teaching management practice has proved that the management level of teachers and undergraduates is very important in universities in improving education quality, practical and innovative abilities of undergraduate students.

Key words: practical ability; innovative ability; experimental teaching demonstration center
